Tokyo, Japan

*I'm an enthusiastic software engineer seeking new opportunities to join passionate teams who're working to create meaningful solutions.*

## ~\$ Experience

Lunaris ~ Tokyo, Japan

**Software Engineer** (contract), January 2022 to Present

- Improving engineering throughput by applying work experience in Agile environments
- Utilizing my software development skills to create client accessible APIs for a variety of applications such as a solution to synchronize information between a popular POS service and Shopify stores
- Refactoring Shopify integration code-bases to be compatible with new Shopify features

Tech exposed to: Elixir, Phoenix, Node.js, React, Shopify Liquid, PostgreSQL, Git

HTM ~ Tokyo, Japan

**Software Engineer**, October 2020 to December 2021

- Developed applications to improve internal and client facing back-office processes
- Utilized the Rapid Application Development model to quickly build new solutions while adapting to dynamic requirements
- Designed application architectures that better matched the team's development model to allow for faster application turnaround

Tech exposed to: Node.js, Vue.js, VBA, C#, ASP.NET Core, Entity, MS SQL Server, MS Access, SVN

NTT Communications Engineering ~ Tokyo, Japan

**Software Engineer** (contract), February 2020 to October 2020

- Worked in system design as a contract software engineer through Human Resocia
- Developed tools and scripts to improve software development workflow
- Researched and documented methods on integrating multiple applications of various sources

Tech exposed to: Node.js, Vue.js, Electron, BASH, Git

Sensus ~ Boise, Idaho, USA

**Software Engineering Intern**, October 2016 to August 2017 & August 2018 to August 2019

- Designed and developed automated testing systems for Node.js web application
- Participated in regression testing periods by executing manual tests, documenting failures, and validating bug fixes

Tech exposed to: Node.js, Mocha, TestCafe, BASH, Jenkins, Docker, Vagrant, Git

## ~\$ Education

Boise State University ~ Boise, Idaho, USA

**Bachelor's of Science, Computer Science & Japanese Studies minor** August 2019

Hosei University ~ Tokyo, Japan

**Foreign Exchange, Japanese Language Study**, September 2017 to August 2018

## ~\$ Skills

Languages

**English** (native) & **Japanese** (intermediate)

Workflow

Has experience working with both Scrum and Rapid Application Development models.

Hobbies & interests

I love playing around with new tech, exploring open-source projects, and self-hosting. I'm also, avid coffee drinker, weekend cyclist, and video game enthusiast.

## Letter of Recommendation

October 4, 2021

To whom it may concern,

I had the pleasure of working with Allen Clark at HTM from Oct 2020 to Feb 2021. He joined as a software engineer and we worked together on several projects before I left HTM in Feb 2021.

From the moment I interviewed Allen, I could feel his passion for software engineering and continuously improving his skills. In a matter of weeks, he became the go-to guy for all matters JavaScript and Vue.

Upon joining HTM, Allen was thrown into the middle of a high-stakes, fast-moving project and was able to quickly adapt to the company's unique culture and make big contributions. That project would not have been a success without him.

Although we didn't work together for very long, I always found Allen to be very easy to work with. He was a great listener and always insightful questions and comments during planning meetings. With little direction, he could take complex problems and implement simple solutions. I was particularly impressed with Allen's drive to implement better development practices, and his ability to learn things quickly.

I am confident that Allen would be a great asset to any development team.

Matt Bancroft  
Former Vice President at HTM Corporation
